

You Love Fabrifoam®'s CarpalGard™... But You Need CMC Joint Support

The New Ultra CarpalGard™ Is Your Answer

Feel the Fabrifoam Difference...
Ask Your Patterson Medical Representative For Information & Your FREE Sample

Whether you're treating tendonitis, arthritis, UCL, CTS, wrist pain or wrist strain, your hand therapy patients will benefit from the Ultra CarpalGard's extremely comfortable, yet sturdy, CMC joint support. It effectively immobilizes the thumb while allowing for unrestricted daily activities.

This innovative 2-part device, created from Fabrifoam's Enthera™, provides customized positioning and support for the CMC joint. Enthera affords optimal adjustable compression to the thumb and wrist with enhanced energy and recovery.

Your Patients Will Love The Feel Of Fabrifoam

The gripping power of our patented materials allow the devices to stay in place without the need to over-tighten. As with all Fabrifoam devices, the low profile Ultra CarpalGard is:

- Breathable
- Simple to Apply
- Wicks Away Perspiration
- Latex-free, Neoprene-free and Adhesive-free
- Soft, Lightweight & Washable
- Available in Adult and Pediatric Sizes

Superior Patient Outcomes Are Sure To Follow
