Doctor Please Don't Tape My Toes

Put An End To Taping With The Toe Fx™

The simple, professional way to treat toe fractures

- *Ideal for minor or small non-displaced fractures or as a follow up after surgery.*
- *Unique wrap provides totally adjustable compression and support to secure two or three toes together to help stabilize fractures, to realign the bone and keep it immobile until healing takes place.*
- *Easy to apply, just wrap and secure with attached Velcro®.*
- *Stays in place without sticky adhesives.*
- *Can be cut to custom length for optimal fit.*
- *Fits in most footwear.*
- *Latex-free and neoprene-free.*
- *Washable and reusable.*

Your Patients Will Love the Feel of Fabrifoam

You'll love the way it works

Fabrifoam® is a patented material created to treat biomechanical ailments to ensure superior outcomes. Our fabric/foam material joins latex-free open-cell foam, on one side, with high quality Velcro® receptive fabrics on the other. Fabrifoam's patented foam backing enables our line of dynamic devices to grip the body without the mess of adhesives. This superior gripping power gives a practitioner the ability to reposition and support body parts to improve function and aid in healing, with total comfort and safety for the patient.
