Fabrifoam Rx & Enthera™

Fabrifoam® introduces

Fabrifoam® Rx

A *new* and *exciting* line of medical devices, designed by and for medical professionals, specifically to treat biomechanical ailments for patients under their direction and care.

The Rx line represents an advance in the dynamic treatment of musculoskeletal ailments, injuries and preventative care.

Simple yet effective, soft-to-the-touch yet powerful, Fabrifoam Rx offers a conservative, non-invasive, cost-efficient path to superior outcomes.

Fabrifoam Enthera™

Enthera, the newest Fabrifoam therapeutic material, provides optimal compression and enhanced support.

The Rx podiatry devices are created with Fabrifoam Enthera. The product designs allow for easy application, and fit in most footwear.

Metatarsal Protection Jacket

The Metatarsal Protection Jacket - a unique conforming wrap that allows for precise, lightweight support to the fore-foot while providing unsurpassed comfort and protection to the submetatarsal "ball of the foot" area.

The unique material and design enable the foot to remain unrestricted and cool during activities and movements as it supports and protects the forefoot.

Helpful in reducing the pain from bursitis, metatarsalgia, neuritis and capsulitis. The wrap also helps to straighten and improve function of the lesser digits to minimize submetatarsal pressure and pain. Provides enhanced cushioning and support during barefoot activities such as gymnastics and dance.

Size	Left	Right
S	08-152-0204	08-152-0238
M	08-152-0212	08-152-0246
L	08-152-0220	08-152-0253

Tarsal Support Wrap

The Tarsal Support Wrap - similar to Fabrifoam's top selling Pronation Spring Control device (PSC), the TSW is a dynamic orthosis used to treat plantar fasciitis, chronic heel pain and excessive pronation with added features for improved rearfoot control and enhanced medial longitudinal arch support.

Easily applied the device is ideally suited for individuals suffering from flatfoot, lower leg or foot fatigue or discomfort, or postural problems related to poor foot mechanics. Can be worn with or without an orthotic to provide mild or moderate support.

Size	Left	Right

M	08-152-0154	08-152-0188
L	08-152-0162	08-152-0196

Toe Fx ™

The Toe Fx™ - a simple, yet effective, safe, conservative treatment for repositioning of the toes.

This unique wrap provides totally adjustable compression and support to secure two or three toes together to help stabilize fractures, to realign the bone and keep it immobile until healing takes place.

Recommended for minor or small non-displaced fractures or as a follow up after surgery. The Toe Fx is easy to apply and fits in most footwear. It can be cut to customize the length and sizing for optimal fit.

Toe Fx™	(10-pack)	08-152-0261

VerSupport™ Heel Protection Wrap

VerSupport™

Heel Protection Wrap – a versatile and unique wrap that allows for intimate contact with the heel while providing unsurpassed comfort and protection to both the plantar and posterior aspect of the heel.

The unique material and design enables the foot to remain unrestricted and cool during activities and movements as it supports and protects the rearfoot.

Recommended for heel-related problems such as retrocalcaneal, insertional bursitis, Achilles tendinitis, sub-calcaneal bursitis and fat pad atrophy pain. Especially helpful during barefoot activities such as karate gymnastics or dance for enhanced cushioning and protection.
