The Fabrifoam Difference...
Superior Outcomes

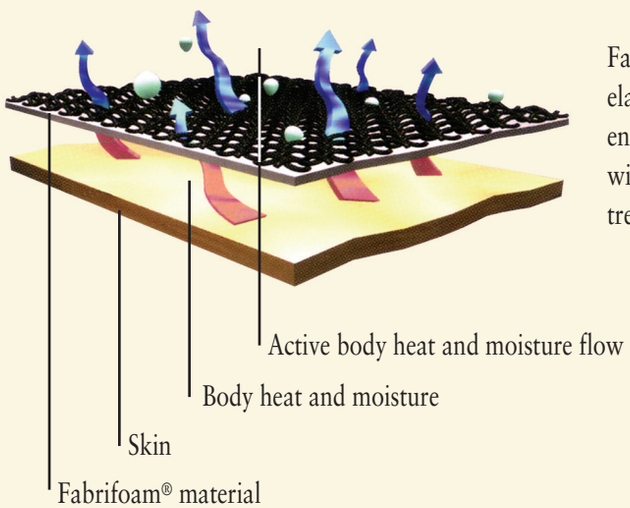

NuStimWrap

Simple, yet effective, soft-to-the-touch yet powerful, NuStimWrap replaces neoprene wraps for wrist, elbow, ankle, and knee supports. This extraordinary non-latex wrap is dermatologically safe and can be used safely and repeatedly to achieve optimal benefits when compression/support therapy is required. It provides a conservative, non-invasive, cost-efficient path to the superior treatment of musculoskeletal ailments, injuries and preventive care.

- Allows for a moderate degree of two directional stretch.
- Secures proper placement of electrodes, hot or cold packs, and customized supports.
- Stays in place without adhesives, secures with Velcro®
- Useful in treatment and therapies of pediatric bio-mechanical ailments.
- Like all Fabrifoam products NuStim Wrap is Latex-free and Neoprene-free
- Infinitely adjustable and can be cut for custom length and shape
- Breathable, washable, durable and reusable

How Fabrifoam Materials Work

Fabrifoam® is a composite material combining an open celled, elastomeric, non-latex foam with selected high quality and specifically engineered fabrics. Fabrifoam® provides physical therapy professionals with a wide assortment of superior compression/support therapy tools to treat discomfort related to soft tissue.
