# Fabrifoam's® Strategic Material for Orthopedic Therapies

*Fabrifoam*® is a patented, fabric/foam composite joining our hydrophilic, open-cell foam with high quality fabrics designed for the treatment and prevention of musculoskeletal conditions. This versatile material is used to manufacture our line of pre-formed devices, straps, wraps and roll goods to serve a wide variety of medical practitioners. Its unique characteristics assure high patient compliance and successful outcomes. Fabrifoam is offered in five versions to provide the greatest flexibility of use and care. Made in the USA.

## SuperWrap™

4-way stretch with a high degree of multi-directional elasticity for adjustable compression and support. Highly conformable, follows the varying contours of the body yet remains effective.

In 2", 3", 4" and 6" wide rolls and assorted lengths.

## ProWrap™

Delivers strength with 2-way elasticity. Excellent for use as a superior strapping material, compression wrap or customized support.

In 2", 3", 4" and 6" wide rolls and assorted lengths.

## NuStimWrap™

Moderate 2-way stretch. Use for customized supports and repositioning also used to secure proper placement of electrobes, hot/cold packs.

In 2-1/2", 4" and 6" wide rolls and assorted lengths.

## MediWrap™

Low to medium degree of 2-way short-stretch (similar to athletic tape). Use as a more rigid support for restricting mobility and preventative care.

In 1", 1-1/2", 2", 3", 4" and 6" wide rolls by 5 yards long.
